### Product Feature AND Application of the **Equine Swimming Pool Rubber Floor**

#### **Matting:**

**Equine Swimming Pool Rubber Mats** providing your horse with longevity, top-quality comfort, and being generous to your pocket. They can be moved on their own by one person allowing quick washing, repair, and fitting. These consist of a combination of rubber and foam that offers superior insulation and are available in a variety of thicknesses and have various characteristics that will match most robust matting needs.

① Characteristics are to protect the horses, and make the ground elastic, so that the floor will not cause damage.

② Modular design allows flooring to be joined together for completeness, ease installation, disassembly and transportation.

③ Rubber surface friction, strong anti-skid. The racehorses will walk through it in great comfort.

④ Built-in steel plate, can withstand great pressure, can be placed at the bottom of the swimming pool.

⑤ Professional rubber formula physical property is not easy to change. Which is application Rubber floor for racetrack pool bottom.
